

## **Hanshan Dong BSc MPhil PhD CEng FIMMM**

Hanshan Dong received his BSc from Shanghai University, his MPhil from Dong-Hua University and PhD from University of Birmingham. He is Professor of Surface Engineering and Leader of Surface Engineering Research Group at the University of Birmingham.

He is a leading surface engineering expert in developing novel surface engineering technologies, surface engineering design and modelling, and characterisation of surface engineered materials. Hanshan Dong has published more than 230 papers in international journals and conferences together with 6 patents, 1 book and 4 book chapters. He won the Harvey Flower Titanium Prize 2004 awarded by IoM<sup>3</sup> in recognition of his contribution to the science and technology of surface engineering of titanium alloys. He is active in international surface engineering activities including visiting professorships and plenary and invited lectures to major international conferences.
